California Cap-and-Trade Program and Québec Cap-and-Trade System November 2023 Joint Auction #37

Summary Results Report

Background

The California Air Resources Board (CARB) and Québec's ministère de l'Environnement, de la Lutte contre les changements climatiques, de la Faune et des Parcs (MELCCFP)¹ held a joint auction of greenhouse gas (GHG) allowances on November 15, 2023. The auction included a Current Auction of 2013, 2014, 2016, 2018, 2020, 2021, 2022, and 2023 vintage allowances and an Advance Auction of 2026 vintage allowances. The information provided in this report is a balance between the need for program transparency and protection of information about individual qualified bidders' market positions.

Prior to the certification of the auction, CARB and MELCCFP staff and the independent Market Monitor carefully evaluated the bids and determined that the auction process and procedures complied with the requirements of the California and Québec Cap-and-Trade Regulations (the Regulations). As provided below, the Market Monitor made the following determination:

The Market Monitor found that the auction was cleared consistent with the auction clearing rules in the Regulations and appropriate economic logic. The Market Monitor confirmed the clearing price and clearing quantities by qualified bidder for the Current Auction of 2013, 2014, 2016, 2018, 2020, 2021, 2022, and 2023 vintage allowances and for the Advance Auction of 2026 vintage allowances. The auction algorithm correctly applied requirements of the Regulations covering the bid guarantee. The Market Monitor did not observe any breaches of security or communication protocols.

The Market Monitor recommends that CARB and MELCCFP approve the November Auction results.

Auction proceeds figures are not shown in this report because of the exchange rate process for determining final auction proceeds in a joint auction. Winning bids are submitted in one of two currencies – U.S. dollars (USD) or Canadian dollars (CAD). After receiving payment from the winning bidders, and using instructions from the linked

¹ Ministry of the Environment, the Fight against Climate Change, Wildlife and Parks

jurisdictions (California and Québec), the Financial Services Administrator will exchange some amount of currency at then-prevailing market rates prior to transferring the auction proceeds to the jurisdictions.

The Financial Services Administrator will distribute auction proceeds to the jurisdictions after all qualified bidder payments are received. The jurisdictions will receive auction proceeds by December 14, 2023. As provided in the California Cap-and-Trade Regulation, sellers who consigned allowances in this auction will be paid the auction settlement price in USD for every consigned allowance sold. Information regarding jurisdiction-specific auction proceeds will be published after the auction is final.

California must receive auction proceeds only in USD. Québec must receive auction proceeds only in CAD. Thus, the total amount of auction proceeds received by the jurisdictions from the sale of allowances may be higher or lower than the auction settlement price multiplied by allowances sold depending on the prevailing exchange rates in effect at the time of currency exchange prior to the distribution of auction proceeds. Each jurisdiction will separately post information on December 14, 2023, providing the final amount of proceeds transferred.

Explanatory Notes: Qualified Bid Summary Statistics

General Term Explanation

Total Allowances Available for Sale: Total allowances available, by vintage, for

purchase in the Current Auction, including allowances consigned by consigning entities and allowances offered for sale by the State of California and the Province of

Québec.

Total Allowances Sold at Auction: Total allowances purchased, by vintage, in

the Current Auction in metric tons.

Total Qualified Bids Divided by Total

Allowances Available for Sale:

Total number of allowances (all vintages) included in all the qualified bids for the Current Auction allowances (regardless of bid price) divided by the total number of Current Auction allowances available in the

auction.

Proportion of Allowances Purchased by

Compliance Entities:

The total number of Current Auction allowances (by vintage) purchased in the Current Auction by Compliance Entities divided by the total number of Current Auction allowances sold in the Current Auction. A Compliance Entity is a Covered Entity or Opt-in Covered Entity as defined in California's Cap-and-Trade Regulation or an Emitter as defined in Québec's Cap-and-

Trade Regulation.

General Term Explanation

Herfindahl–Hirschman Index (HHI): The HHI is a measure of the concentration

of allowances purchased by winning

bidders relative to the total sale of Current Auction allowances (regardless of vintage)

in the auction. The percentage of

allowances purchased by each winning bidder is squared and then summed across all winning bidders. The HHI can range up to 10,000, representing 100% of the current

vintage allowances purchased by a single

bidder (i.e., 100x100=10,000).

Qualified Bid Price Summary Statistics: Statistics are calculated from all the

qualified bids for the Current Auction allowances (regardless of bid price). All price statistics are shown in USD and CAD.

Qualified Bids: The bids that remain after a qualified

bidder's submitted bids have been

evaluated and reduced to meet all bidding

limitations.

Auction Reserve Price: The minimum acceptable auction bid price

for Current Auction allowances shown in

both USD and CAD per metric ton.

Settlement Price: The Current Auction allowance price that

resulted from the auction, in USD and CAD

per metric ton.

Maximum Price: Highest qualified bid price.

General Term Explanation

Minimum Price: Lowest qualified bid price.

Mean Price: Average qualified bid price calculated as

the sum of the qualified bid prices times the bid allowances at each qualified bid price divided by the sum of all qualified bid

allowances.

Median Price: The price per metric ton calculated so that

50% of the qualified bid prices fall above and 50% fall below the median bid price.

Median Allowance Price: The price per metric ton calculated so that

50% of the qualified bid allowances fall above and 50% fall below the median

allowance price.

Auction Exchange Rate (USD to CAD FX

Rate):

The exchange rate in effect for the joint auction that is set the business day prior to the joint auction as the most recently available daily average exchange rate for USD and CAD as published by the Bank of Canada the day before the joint auction.

Advance Auction

The statistics presented in the report for the Advance Auction are computed in the same manner as the statistics computed for the Current Auction. No allowances are consigned by consigning entities to the Advance Auction.
